

PROFESSIONAL SUMMARY

Data Analyst with **3+ years** of experience analysing **large-scale healthcare datasets** and delivering actionable insights to support **clinical decision-making**. Skilled in **SQL, Python, and Databricks** to perform **EDA, data validation, and KPI reporting** on real-world data. Experienced in building **analytics-ready datasets** using **Medallion Architecture**, enabling reliable reporting across multi-cloud environments. Additional expertise in **GenAI and LLM solutions** using **LangChain and OpenAI GPT** to enable self-service data exploration.

SKILLS

- Data Engineering:** PySpark, Spark SQL, Databricks, Delta Lake, ETL/ELT, Data Modeling, Medallion Architecture
- Programming:** Python (Advanced), SQL (Advanced), Shell Scripting
- Cloud & Storage:** Azure Blob Storage (Primary), AWS S3, SFTP, Delta Sharing, Azure Data Factory
- Data Analysis:** Pandas, NumPy, Plotly, Matplotlib, Seaborn
- Visualization:** Tableau, Power BI, Excel
- Machine Learning & AI:** Scikit-learn, XGBoost, LightGBM, TensorFlow, Keras, NLP, LLMs, RAG, OpenAI
- Data Quality:** Data Validation, Data Profiling, Reconciliation

EXPERIENCE

- Data Engineer (Contract via Tekizma) | McKesson**

Sep 2023 - Present, Bangalore

 - Developed **Databricks ETL pipelines** using **PySpark and Spark SQL** and performed **exploratory data analysis (EDA)** on **100+ GB of healthcare data** to generate **analytics-ready datasets**.
 - Developed **VBC clinical data models** using **complex SQL** within a **Medallion architecture**, delivering **>99%** accurate **analytics datasets** through robust **transformation and validation logic**.
 - Designed and implemented **10+ automated data delivery frameworks** with **data validation, reconciliation, and audit checks**, enabling **secure multi-cloud distribution** across **Azure Blob, AWS S3, SFTP, and Delta Sharing**, reducing manual effort and improving pipeline performance **by ~40%**.
 - Optimized **ETL pipelines** using **parallel processing and multiprocessing**, reducing pipeline runtime **by 50%**
 - Collaborated in **Agile development** environment using **Git version control**.

- Product Engineer | Tekizma**

Jan 2023 - Aug 2023, Bangalore

 - Built end-to-end **data analytics workflows** for **ingestion, transformation, de-identification, analysis, and visualization** using **Python, Angular, and Database**, enabling streamlined analytics pipelines.
 - Developed modular components for **data cleaning, transformation, ML algorithms (Random Forest, K-Means, supervised learning), and visualization**, automating data processing and reducing manual analysis effort **by 30–40%**.
 - Implemented a **conversational AI** interface using **OpenAI GPT-3.5 and LangChain**, enabling **natural language querying** and exploration of enterprise datasets.

KEY PROJECTS

- GenAI Conversational Data Assistant**

 - Built a **conversational AI assistant** using **Python, LangChain, and OpenAI GPT** to translate **natural language prompts** into optimized **Oracle SQL queries**, enabling **self-service data exploration** on enterprise databases.
- Automated Data Transformation Pipeline**

 - Designed and implemented an **automated spark streaming pipeline** to **unpivot and transform datasets** for **analytics workflows**, enabling **scheduled data preparation and delivery** to dashboard teams.

EDUCATION

- Coimbatore Institute of Technology**

Integrated M.Sc (Data Science)

- Graduated with a **CGPA of 8.9**
- Jun 2018 - May 2023, Coimbatore
